Introduction

Use **WebFCP** to administer your FDD system by creating and managing users, groups, file cabinets, permissions, and more. When starting out, you need to define the file cabinet structures that will store your documents and outline the security scheme your organization needs.

All you need is a browser on your desktop to login to WebFCP and manage your FDD system. A desktop version of FCP that is installed on your computer is also available.

Requirements

WebFCP requires the following:

- Java Runtime Environment (JRE) version 7 or 8.
- Apache Tomcat. We recommend version 7.

Install WebFCP

To install WebFCP:

1. Run the WebFCP installation package.

You may receive a prompt asking if Tomcat is installed, even if Tomcat is already installed. Click **Yes**.

Feith Web Control Panel - InstallShield Wizar	d 🔀
TOMCAT_HOME not found in the registry. Is Tomcat installed?	
<u>Y</u> es <u>N</u> o	,

In the **Tomcat Home Directory** screen, browse to and select the Tomcat home directory (e.g. C:\Program Files (x86)\Apache Software Foundation\Tomcat 7.0).

Upgrade WebFCP

To upgrade WebFCP:

- 1. Run the WebFCP installation package. The Welcome screen opens.
- 2. Select Repair and click Next to continue.

The Modify option is not recommended as it does not upgrade existing components or
features.

Feith Web Cont	rol Panel - InstallShield Wizard			
Welcome Modify, repair	r, or remove the program.			
Welcome to the Feith Web Control Panel Setup Maintenance program. This program lets you modify the current installation. Click one of the options below.				
○ <u>M</u> odify				
13	Select new program features to add or select currently installed features to remove.			
• <u>Repair</u>	Reinstall all program features installed by the previous setup.			
C <u>R</u> emove	Remove all installed features.			
n november nie fu	< <u>B</u> ack <u>N</u> ext > Cancel			

- 3. You may receive a prompt asking if Tomcat is installed, even if Tomcat is already installed. Click **Yes** and select the **Tomcat Home Directory**.
- 4. You receive a prompt asking you whether to replace the existing configuration file. Click **Yes** to replace the configuration file and enter new database connection information. Click **No** to keep the existing configuration file.

Feith Web Control Panel - InstallShield Wizard					
A Feith Web Control Panel configuration file exists already. Do you want to replace it?					
<u>Y</u> es <u>N</u> o Cancel					

If you click **Yes** to replace the existing configuration file, you are prompted to select the database type, database port number, database server host name, database instance or SID, and database connection string. WebFCP is upgraded.

5. On the Maintenance Complete screen, click Finish to complete the upgrade.

See Feith WebFCP User Guide for more information on administering your FDD database.

6. You are prompted as to whether you want to restart Tomcat. Click **Yes** to restart Tomcat or click **No** to leave Tomcat off for now.

Confirm WebFCP is Running

To confirm WebFCP is running:

1. In the browser, navigate to WebFCP in your browser. An example URL:

http://prodserv/fcp

2. You are prompted with the WebFCP login screen, which confirms WebFCP is running.
