Caves visited: Whiting's Neck and Jones Quarry

Cullen

I did the Jones quarry. It was an awesome time. It was cool to. We literally we went swimming at the very bottom of the cave. I believe that it was the best because Buddy never told us any direction it was funny. But all and all it was the best caving ever!!!!!!!!!!!!!!

Tom

This is a great perspective of rock formations and how they form underground. One does not really think what goes on underground until it is in right in front of your face. The formations were really pretty even as plain and simplistic as some where and the flakes of mica or fools gold in the roof of the upper section reminded me of the night sky ironically since we were underground.

This was a much more involved caving expedition that I originally thought. I knew there was going to be some climbing and crawling but did not realize the amount that was to occur and really pushed my abilities to do these but in a positive way. I appreciate the time you took to lead our Troop and I do not think I would have done a tour like this if it was not for you,

Thank you

William

This was my second time caving and it was as fun as the first! The difficulty level increased, but was still possible. It was great fun going with friends, with a lot of laughs and good times. The underground lake was a big surprise, but added a new experience. Mr. Buddy was a great guide who emphasized our own leadership. This trip is highly recommended!

Ben

This was my first time caving and I enjoyed it a lot. My favorite part was the underground parts. I enjoyed the stuff that came after that as well. I liked lying on the road. I liked my food. I liked nature. I liked my friends. I liked the rope at the beginning.

Thanks Mr. Buddy.

Aaron

"Mr. Bud, what's down this way? ""More cave..." This was my second trip caving with Mr. Bud, and it was definitely a different experience from the first trip. During part of the trip, we descended a vertical shaft into a flooded room and explored the area. Mr. Buddy was a great guide and I appreciate the time he spent with us today. Thanks Mr. Bud!

Thomas

This was my second time caving and my 1st time going with the older group, and it was a great challenge. When I climbed down 30 ft vertically and jumped into 4 and a half ft of water, I realized why the packing list said "towel and spare shoes." "Is this the right way???"....."It's A way." But it was a great experience and we all really appreciate it. Thanks Mr. Buddy

Alex

I've been caving before but this was my favorite time. I had a great time and it was really exiting. I really loved the water at the bottom of the pit. Even though it was really cold and wet I still had a great time. I've never been so happy to see sunlight. It was an awesome new experience and I'm really glad I did it. Thanks Mr. Bud

Alex

This was my second time caving and it far surpassed the last time I went. This cave challenged me physically as well as mentally when I was trying to force myself to push onwards through the tight parts of the cave. The part in which we descended downwards before dropping into the water at the bottom was amazing. Swimming in the cave was also a fantastic experience that I will never forget. Thank you, Mr. Buddy, for really taking time to share your knowledge with us and for helping us out when we were trying

to get out of the pit. I was unable to finish the tight parts of the cave this time, but I hope to come back caving with you again and finish it entirely. Thank you so much Mr. Buddy!

Nick

This was an awesome trip. I have gone caving in the same cave twice and liked the it the same amount each time. I liked seeing that climbing up and down steep rocks was easier for me, while crawling threw small holes was very hard. I wish I could have gone with the older group but I had fun anyway. Thanks Mr. Bud.

Rory

This trip was fun, but I preferred it once I got out of the caves. I got stuck multiple times, but it was well worth the effort. The Birthing Canal was the worst, and if we come on this trip again, I'm skipping that part. Also, I'm going to want shoes with more traction next time, since I kept slipping. Thanks!

Andrew

The cave we were in was fun. You slipped a lot, but being small didn't hurt. It was the key because there were a lot of small openings that helped out. I also know that fat men don't fit very well unless you were an expert like Mr. Buddy. Thanks Mr. Buddy, I had fun

Dakota

The cave was a fun trip and fun. I almost slipped at the edge of a rock. Little boys are going to fit small caves easier.

Andrew

The trip was awesome except the walk back in the dark. Everyone was slipping but me because I have quality boots. I didn't like it when I came out of the cave and didn't see day light until I woke up the next morning.

Michael

Awesome trip, the leap of faith was as scary as I remember it. I also believe Mr. Buddy has seen more than is fair share of Lord of The Rings. Also, I was glad I did not have to go in the pancake room. We all died from lack of sunlight.

Jackson

An excellent trip, when I first entered I was like big man not going to fit. But I found out I fit through more small spaces than I thought I could. It was very painful walking back in socks. I had many charlie horses and was in much pain the next morning.
